### **BUILD YOUR MAGIC MOUTHWASH**

**We have revamped our magic mouthwash options to make it more convenient for the prescribers and better tasting for the patient.**

**Any ingredients selected outside of our most commonly requested options are powder based and sweeteners/flavors can be added upon request. This will help cut down on the unpleasant taste of traditional magic mouthwash but is slightly more expensive to make than the traditional combinations (commercially available combined Benadryl, Lidocaine viscous, and Maalox)**

**Medications will be suspended in Maalox, a generic syrup vehicle, or Mucolox (upon request - slightly more expensive \$). If no option is selected, pharmacy will choose.**

**Mucolox allows medication to stick to the mucosal lining up to 24x as long compared to something that is not muco-adhesive.**
